

ELX-705

LED Exit/Emergency Light Combination with Battery Back-Up

Architectural

Catalog Number:

Project Name:

Type:

Note:

MAXILUME
ARCHITECTURAL LIGHTING

FEATURES

This product is an ideal when both an exit sign and an emergency light are required. High-output MR16 lamps are used as part of a new lamp-head design. A full range of manual adjustment is made possible by the swivel-and-point lamp-head design. If AC power is lost, the fixture provides at least 90 minutes of illumination and will automatically recharge after discharge. The operation of the product can easily be monitored and controlled with the use of a conveniently located test switch that indicates charge and diagnostic state. LED and PC circuits have a rating of about 25 years without a drop in illumination.

BODY

- The thermoplastic housing of the product makes it corrosion-proof and scratch-and impact-resistant.
- UV-stabilization prevents discoloration of the product.
- Every fixture includes a canopy, extra faceplate, and replaceable chevron directional indicator knockouts for control of direction.
- Double compartment shaped by injection.

FACE: EXIT

- Single or dual configuration. Solid face included if single face appearance is preferred
- 6" high text with color diffusion
- Knockout directional chevrons

FACE: EMERGENCY

- Beveled face with (2) MR16 lamp heads

MOUNTING

- Unique "snap-together" universal mounting design permits top, back and side mounting. Necessary hardware and canopy are provided electrical

ELECTRICAL

- 120V or 277V Dual Input
- Normally uses 3.8 watts of power, 14 watts in emergency use

LIGHT SOURCE

- **Exit:** LED strips in times of normal functioning
- **Emergency:** (2) 2W MR16 lamps with matching covers

BATTERY

- 6V 4.5 amp, sealed-lead acid battery
- Minimum 120 minutes of illumination
- Solid-state internal circuitry for charging

TESTING

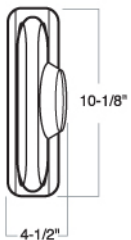

- Test Button
- Indicator light shows high charge and readiness for operation

SAFEGUARDS OF CIRCUITRY

- Protected against short circuits and brown-outs
- Full discharge requires disconnection

LISTED

- Damp location approved
