

Low Profile Cord Connectors

Straight Male N.P.T. , PG, and Metric Thread

Easy to Install,
Full Range of Sizes,
Dependable.

Complete Offering

Hubbell Low Profile Cord Connectors are available in a variety of thread styles and hub sizes. N.P.T. sizes are available from 3/8" - 1". The PG series is available in thread sizes ranging from PG7 to PG21. Metric threads are now available from M12 to M40. All connectors are available in both black and gray color. Locknuts are also available for every thread style.

OEM Value

Low profile cord connectors are smaller in size, provide excellent pullout strength and can be installed without disassembly. When labor and material savings are critical these products allow top performance within budgetary limitations. OEM packs are also available for all standard items. These items eliminate having to contend with individual packages and product labels. Simply pull from a bulk container and start installing. All cord connectors are provided without locknuts. For end users assembling into threaded hubs, there's no need to disassemble the nut. Locknuts can be purchased separately in bulk packages.

Quality Construction

The all nylon construction and Buna N gland resists salt water, weak acids, gasoline, alcohol, oil, grease and common solvents. Acme threads on the body prevent skipping and speeds installation. Ratchet feature prevents unintentional loosening of the compression nut. Products are suitable for NEMA Type 4 and 6 enclosures.
