

LED Pendant

402501-LED

INSTALLATION SHEET

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Technical Support: 1-877-452-6858

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

- 1.** Remove the fixture from its original packaging. Next, remove the canopy mounting plate **(1c)** from within the canopy **(2a)** by removing the two decorative nuts **(2c)**.
- 2.** Using the screws **(1e)** provided in the hardware package secure the mounting plate **(1c)** (with canopy screws pointing downward) to the junction box **(1a)**. To set the fixture hanging height, simply push in the sleeve **(2b)** at the canopy where the wire comes out from. When you have selected your desired length, just release the sleeve and the wire will be held tightly in place.
- 3.** You are now ready to mount the canopy to the mounting plate. First connect all wires **(1b)** correctly black to black "L", white to white "N" and the ground wire with provided marettes from the hardware package. Align the two screws **(1d)** hanging downward from the mounting plate **(1c)** to the two holes inside the canopy **(2a)**. Push the canopy up towards the ceiling so the screws **(1d)** point through the holes in the canopy **(2a)**. Next, screw on the two decorative nuts **(2c)** onto the two screws **(1d)** pointing through the canopy, this will secure the canopy to the mounting plate.
- 4.** You have now completed the installation of your fixture, please enjoy.
