

LED Flush Mount

FM14020

INSTALLATION SHEET

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Technical Support: 1-877-452-6858

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

- 1.** Remove the fixture from its original packaging. Next, remove the mounting plate (1c) from within the canopy (2a) by un-threading the two nuts (2b). Secure the mounting plate (1c) to the junction box with screws (1e).
- 2.** Connect all wires correctly black to black "L", white to white "N" and the ground wire with provided marettes (1b) from the hardware package. Align the threaded studs (1d) with the holes on the surface of the canopy (2a). Next, push the canopy (2a) to the mounting plate (1c) thread on the two nuts (2b) on to the threaded studs (1d). This will secure the canopy to the mounting plate.
- 3.** Once this is complete, place the diffuser (2c) into the fixture. Slightly bend and slide one side of the diffuser (2c) first, then push the other side to succesfully place inside. This will secure the diffuser to the canopy.
- 4.** You have now completed the installation of your fixture, enjoy.
