

Ceiling LED Pendants

PD19601

INSTALLATION SHEET

START FROM HERE

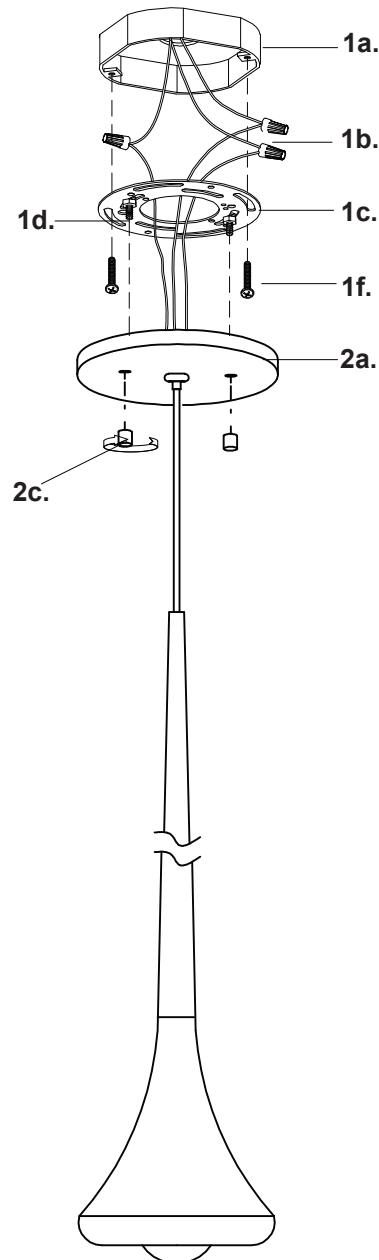

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Technical Support: 1-877-452-6858

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

- 1.** Remove the fixture from its original packaging. Remove the canopy mounting crossbar (**1c**) from the canopy (**2a**) by removing the decorative nuts (**2c**). Secure the mounting crossbar (**1c**) (with canopy screws facing downward) to the electrical junction box (**1a**) by using two screws (**1f**) provided in the hardware package.
- 2.** Connect all wires (**1b**) correctly, black to black "L", white to white "N" and the ground to ground with the provided marrettes from the hardware package. Align the threaded screws (**1d**) hanging downward from the mounting crossbar to the holes inside the canopy (**2a**). Push the canopy up towards the ceiling so the two screws (**1d**) point through the holes in the canopy. You can then screw on the decorative nuts (**2c**) onto the threaded studs (**1d**) pointing through the canopy (**2a**). This will secure the canopy to the mounting crossbar.
- 3.** You have now completed the installation of your fixture, enjoy.
