

Wi-Fi Bulb Setup Guide

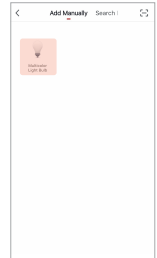

- (1) Install Turolight WiFi LED Bulb SV-A19/10W/WIFI/D in the fixture/socket.
- (2) Connect the power.
- (3) Switch on and off the bulb repeatedly until the bulb blinks, normally after 3 or 4 times. After the bulb blinks, it will enter the networking connection mode just in a few seconds.
- (4) Make your phone wifi connected, then open the APP "TuroSmart" and follow below steps on the APP:

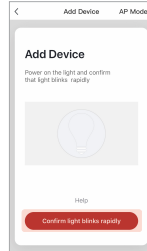

① Click "add advice"

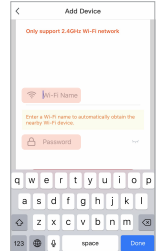

② Choose "Multicolor Light Bulb"

③ Click "Confirm light blinks rapidly"

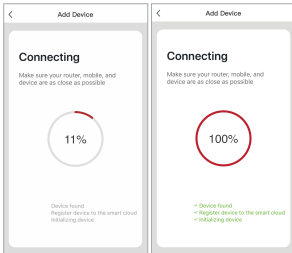

④ Enter your Wi-Fi name & password

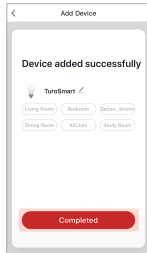

3

⑤ Wait until "Connecting" is complete

⑥ "Device added successfully" Click "Completed"

4

③ "Color" – Select the exact color and brightness you want

④ "Scene" – Choose from the pre-defined scene for a fast setup

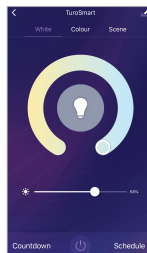

(5) App Control interface (Key Features)

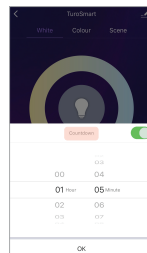

① "On/Off" – Click the switch icon on the middle bottom bar

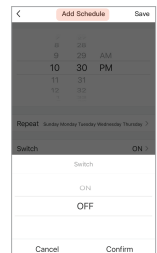

② "White" - Dim the brightness and choose any white CCT you want

⑤ "Countdown" – Set up the timer

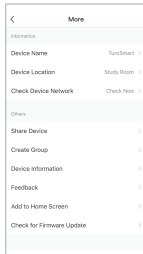

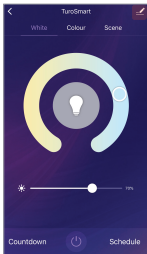

⑥ "Schedule" – Set up a schedule

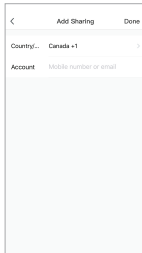

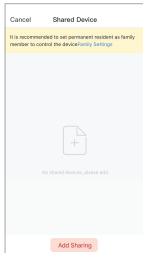

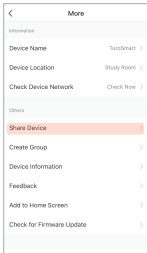

(6) Share the device with other people.

- Click the editing icon in the upper right corner

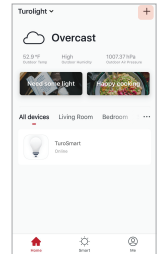

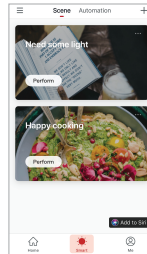

- Click "Share Device"

(7) Create your own scene.

- Click "Smart" icon on the bottom centre
- Click the "+" icon in the upper right corner

- Follow the steps to edit the name, add action and choose "Show on the home page"
