Features & Specifications

Construction	- Pure light aluminum shell provides optimal heat dissipation and high lumen efficacy. - Clear polycarbonate lens over LEDs provides a high light efficacy. Standard 90° beam angle. - CCT and Power Select switches are placed discretely inside the driver housing 6' power cable and 6' dimming cable included in all configurations
Mounting	SF bracket, TR bracket and RS bracket are available. Suitable for different installation scenarios. Can be mounted on round poles, square poles and walls.
Performance Data	- Available in 3000K/4000/5000 K selectable color temperature 80+ CRI - Electrical ratings: 120-347 V - Estimated life of over 100 000 hours to L70 0-10 V dimming driver. Dimming cables included with this luminaire 6kV surge protection (standard) - Operating temperature: -40°C to 45°C (-40°F to 113°F)
Compliances	- cULus certified for wet locations - IP65

Dimensions & Weights

Model	150W	300W	500W
Length in.(cm)	12.32 (31.3)	16.57 (42.1)	26.77 (68.0)

Product Details

Installation

Installation instruction Universal bracket on square/round pole

Unit:mm	1. Split the bracket.	2. Insert the AC/Dim wire from the bracket into the base and fix the 4pcs screw on the lamp body.	3. Fix iron and Rubber Silicones in the lamppost and lock the screws to half.
	4. Insert the AC/Dim wire into the other part of the bracket, tighten the large screw.	5. Make sure the wiring is correct according to the wiring diageam. (L/N/G/ Dim+/Dim-(If have)	6. Put the wire into the support chamber and lock the cover. Adjust to the required angle through large screws.

Installation instruction Universal bracket on tennon bracket

 Ø63 Unit:mm	 1. Split the bracket.	 Fixed 4pcs screws 2. Insert the AC/Dim wire from the bracket into the base and fix the 4pcs screw on the lamp body.	 Fixed screws 3. Insert the AC/Dim wire into the other part of the bracket, tighten the large screw.
	 Connect the wires 4a. Make sure the wiring is correct according to the wiring diagram. (L/N/G/ Dim+/Dim- (If have))	 Fixed 4pcs screws 5a. Install the lamp post and tighten the 4pcs M8 screw.	 Adjusting angle screws 6a. Unscrew the screws to adjust desired angle if needs.
	 4b. Insert the AC/Dim wire into the other part of the bracket, tighten the large screw.	 Connect the wires 5b. Make sure the wiring is correct according to the wiring diagram. (L/N/G/ Dim+/Dim- (If have))	 Adjusting angle screws Fixed 4pcs screws 6b. Install the lamp post and tighten the 4pcs M8 screw. Unscrew the screws to adjust desired angle if needs.

Installation instruction Slip-fitter bracket

 Ø63 Unit:mm	 1. Split the bracket.	 Fixed 4pcs screws 2. Insert the AC/Dim Wire from the bracket into the base and fix the 4pcs screw on the lamp body.	 Fixed screws 3. Insert the AC/Dim Wire into the other part of the bracket, and tighten the large screw.
	 Connect the wires 4. Make sure the wiring is correct according to the wiring diagram. (L/N/G/ Dim+/Dim- (If have))	 Fixed 4pcs screws 5. Install the lamp post and tighten the 4pcs M8 screw.	 Adjusting angle screws 6. Adjust to the required angle through large screws.

Mini Photocell

Part Number	Test Environment	Start-up delay(S)	Off delay(S)	Startup illuminance value(Lux)	Off illuminance value(Lux)	Environment Temperature	Humidity	Precautions
Mini Photocell	Natural light	≤3S	≤3S	≤80	≥150	-40°C~+60°C	99%RH	When installing and using, the sensor head should face upwards to ensure good light transmission.

The preset delay time of ≤3 seconds can avoid misoperation at night due to spotlight or strike.
